

504C

- LONG TREAD LIFE
- ENHANCED TRACTION
- DURABLE CONSTRUCTION

M+S

LONG WEARING TRACTION

The all-new 504C is the latest in all-position durability for on- and off-road severe service operations. The H load-rated 504C represents an upgrade in durability and wet/dry traction. Its superior casing protection and a wider tread profile assure a long lasting original life and enhanced retreadability.

Funnel-Shaped Step Grooves

Promote stone ejection and reduces tread-stone damage.

Circumferential Grooves

Three circumferential grooves with a deep center groove allow for better water evacuation throughout the original tread life.

Wide Tread

Provides a more stable footprint for long original tread life, better traction, excellent wet braking and easier retreadability.

High Strength Belt Construction

Protects against rust and stone penetration while minimizing heat generation.

Cut and Chip Resistant Compound

An advanced compound supplies cut and chip resistance without sacrificing wear performance.
